

Himanshu Sharma

Technical Specialist – Broadcasting & Streaming | Founder & CEO, The KPI Hub

Delhi-NCR, India | [Portfolio](#) | [The KPI Hub](#) | GitHub: hsharmagxi-debug

Professional Summary

Results-driven Technical Specialist and Founder with deep expertise in live broadcast infrastructure, cloud-native platforms, and autonomous AI systems. Currently supporting high-stakes NHL broadcasts with 99.97% uptime while building production-grade SaaS and self-hosted AI platforms. Passionate about building systems that matter — reliable, scalable, and privacy-first.

Experience

Technical Specialist – Broadcasting & Streaming (NHL Project)

GlobalXperts | 2025 – Present

- Delivered reliable live production support for NHL broadcasts across 16 simultaneous feeds with 99.97% uptime, including high-stakes events such as Stanley Cup Finals Game 7.
- Handle real-time monitoring, incident management in ServiceNow, and rapid troubleshooting for live streaming infrastructure.
- Work with AWS MediaLive, MediaPackage, SRT/RTMP low-latency protocols, and VTOC systems.
- Maintain 100% compliance on pre/post-game checklists and detailed activity logging.
- Support NHL Innovation Lab testing and integrations.

Founder & CEO

The KPI Hub | 2025 – Present

- Building a high-trust B2B SaaS intelligence platform delivering real-time category intelligence (funding, launches, pricing, hiring) via AI-synthesized daily briefs.
- Tech Stack: Next.js 15, TypeScript, Tailwind, Supabase, Claude 3.5 Sonnet.
- Leading product development, automation pipelines, and go-to-market strategy.

Key Projects

AetherAI — Self-hosted, privacy-first AI Operating System

Docker Compose stack with Ollama, ChromaDB, Open WebUI, and multi-agent architecture.

Designed for air-gapped enterprise use across 9 departments.

PolyMind — Multi-LLM Platform

Chat with GPT-4o, Claude, Gemini via OpenRouter with document RAG, code assistant, and image generation capabilities.

Lumina Numerology App — Free, offline, high-accuracy numerology PWA

Implements Pythagorean & Chaldean systems with a 5-expert consensus engine. Fully local with no data collection.

Engineering Case Studies — Written breakdowns (CI/CD, Terraform state, DevSecOps, Observability) published on the portfolio's /engineering section, with an embedded AI assistant for Q&A.

Skills

Broadcast & Streaming: AWS MediaLive, MediaPackage, SRT, RTMP, Live Monitoring, VTOC, ServiceNow

AV Systems & Enterprise Networking (5+ yrs): Q-SYS, Crestron, AMX, HDBaseT, VLANs (802.1Q trunking), L2/L3 switching, RSTP/MSTP, BPDU Guard, DHCP Snooping, switch port security, SOW/commissioning, red-line drawings

Cloud & Infrastructure: AWS, Docker, Vercel, Supabase (with RLS), Zod, GitHub Actions, CI/CD

AI & Agentic Systems: Claude, Ollama, LangGraph-style agents, n8n, RAG, Multi-agent orchestration, AetherAI architecture

Full-Stack Development: Next.js 15, TypeScript, Tailwind CSS, shadcn/ui, React

Platform Engineering Mindset: Reliability (99.97%+), Observability, Automation, Documentation-first approach, Incremental hardening

Education & Certifications

- AWS Certified MediaLive & MediaPackage Specialist (Feb 2026)
 - Advanced ServiceNow Incident Management & Automation
 - Selected as India's Top 300 Builders at VibeCon 2025 (YC × Anthropic × Lightspeed × Razorpay)
-

Recognition & Impact

- Supported NHL broadcasts including Stanley Cup Finals Game 7 with zero feed drops.
- Built and launched multiple production-grade projects including The KPI Hub and AetherAI.

- Strong focus on building systems that are reliable, private, and genuinely useful.
